JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Campbellton, a town in New Brunswick, situated on the Restigouche River opposite Mann.

Respectfully,
 ELZÉAR PELLETIER,
Secretary Board of Health of the Province of Quebec.
 The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CUBA.

Reports from Cienfuegos, Casilda, and Santa Cruz del Sur.

CIENFUEGOS, CUBA, *January 22, 1900.*

SIR: I have the honor to report that during the week ended January 20, 19 deaths have occurred in this city, 3 from malaria, 5 from intestinal diseases, and 1 from tuberculosis. Nine of these deaths were in the civil hospital. Death rate for the week is 24.76. No contagious diseases reported in the city. Inspected 8 foreign vessels during the week and issued 6 bills of health. Inspected and passed 250 bundles of hides, shipped to Hamburg, Germany, via New York, on the steamship *City of Washington*.

Casilda.—Dr. Alejandro Cantero reports 10 deaths in the city of Trinidad, 3 from malaria, 2 from intestinal diseases, and 2 from tuberculosis. The total number of cases of varioloid has reached 34; no deaths have occurred; nearly all are convalescent. Am very careful about allowing any baggage, especially bedclothing, to be moved by any of the patients from their houses. No foreign vessels have been inspected at this port during the week.

Santa Cruz del Sur.—Dr. Juan R. Xiques reports 1 death during the week, from malaria; no contagious diseases reported. Steamship *Volund* from Barranquilla, inspected at this port during the week.

Respectfully,
 J. M. LINDSLEY,
Acting Assistant Surgeon, U. S. M. H. S.
 The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Havana.

HAVANA, CUBA, *January 23, 1900.*

SIR: I have the honor to submit the following sanitary report for the week ended January 20, 1900:

Two cases of yellow fever were reported during the week and no deaths. Four cases remained under treatment on January 20, 1900. This is a very satisfactory showing and is a marked decrease from the previous week.

There were 81 deaths from all causes reported during the week, showing a mortality of 19.13 per thousand. These figures compare favorably with the mortality of most large cities in other parts of the world. The weather has continued cool with considerable rain.

The Spanish steamship *Santanderino* arrived from Liverpool and Spanish ports on the 15th instant, with 2 cases of smallpox on arrival at this port. As already reported, the vessel was immediately sent to Mariel Quarantine Station, where the passengers and nonimmune members of the crew were disembarked, and the vessel returned to this port for disinfection, after which she was released from quarantine and permitted to discharge her cargo.

Bureau telegram stating that all quarantine restrictions at Miami

were removed was received on the 19th instant, and the proper steps were at once taken to remove the restrictions in vogue at this port.

* * * * *

The Spanish floating dry dock in this port was disinfected by the barge *Protector* on the 14th instant.

On the 18th instant, a general inspection of the entire station was made by the medical officer in command. The station in general was found to be in fair condition, and many minor deficiencies found were corrected. It is proposed to continue these inspections once a week, as they have an excellent moral effect in keeping the different departments running smoothly and in harmony.

I have the honor to transmit herewith the usual mortality table for the week ended January 20, 1900, and also a report of baggage disinfected by the barge *Protector* during the same period.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.
